ABOUT SOGCE

The Sabah Oil, Gas & Energy Conference & Exhibition (SOGCE) is Sabah's premier and longest-running industry event dedicated to advancing the oil, gas, and energy sector. Since its inception, SOGCE has evolved in line with emerging trends, state priorities, and global energy shifts — from traditional petroleum development to today's focus on low-carbon pathways, digitalisation, and sustainable growth.

In 2026, under the theme “Fueling the Future: Driving Energy Innovation for Sustainable Growth,” SOGCE will highlight the industry's transformation through wider adoption of AI, big data analytics, innovative technologies, and strategic partnerships. The event reflects the Sabah State Government's steadfast commitment to developing oil and gas as a key revenue driver, while attracting new investments and enabling local participation.

SOGCE serves as a dynamic platform connecting policymakers, industry leaders, technology providers, investors, and service companies. It offers unrivalled opportunities to:

- * Explore new technologies and innovations driving operational excellence.

- * Foster partnerships and collaborations that open doors for local contractors.
- * Engage in meaningful discussions on sustainable energy transitions and low-carbon solutions.

The 13th edition will feature a 2-day conference with impactful plenary sessions, parallel sessions and technical papers, running alongside a 2-day exhibition showcasing the latest equipment, solutions, and services.

Signature highlights include industry visit, SOGCE Networking Golf, Energy Insight Hub programmes and the Young Professionals Programme, designed to inspire the next generation of industry talent.

SOGCE continues to be more than an event — it is a catalyst for growth, collaboration, and innovation, shaping the energy future of Sabah and beyond.
